NeoRDP - Product Vision Document

Product Vision Document: NeoRDP

1. Introduction:

NeoRDP is a modern Remote Desktop Protocol (RDP) management platform designed to provide seamless purchase, monitoring, and management of RDP services. It targets tech users, businesses, and IT professionals who want to manage RDP resources with intuitive UI, real-time insights, and intelligent AI assistance.

2. Product Vision:

To become the go-to solution for fast, secure, and AI-enhanced RDP management. The system will enable users to purchase, monitor, and manage their RDPs through a centralized dashboard and assist them using an AI-powered assistant.

3. Key Features:

- Secure user authentication (JWT-based)

- RDP browsing and purchasing

- Usage dashboard with real-time metrics

- AI assistant for user help and system automation

- Admin panel for backend control

4. Stakeholders:

- End Users (Customers)

- Admins (Platform Owners)

- Developers

5. Future Vision:

The system will evolve into a SaaS platform offering advanced integrations like billing, multiple OS support, and customizable RDP deployment.
